

Stimulating young minds

Thriving curiosity

Empowering children

Making a fertile ground for learning

STEM is Fun for Kids at Coolidge Elementary School

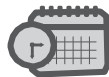

STEM Beginnings offers fun-filled and exciting programs focused on building and sustaining interest in the areas of Science, Technology, Engineering, and Mathematics (STEM). Our main goal is to introduce STEM-related concepts through effective instruction and enjoyable activities. We believe that the creation of a fertile ground for learning starts during a child's early years. We aim to stimulate young minds and inspire them to create and cultivate curiosity toward these disciplines. As a result, we hope to be able to contribute in shaping their intellectual development, opportunities for future study, and choices of career, as well as their capability to make informed decisions in the future.

STEM is Fun for Kids | Kindergarten to 4th Grade

Through hands-on activities and STEM challenges, children will think, construct, experiment, discover, and develop the desire to learn more. The children will explore the use of different learning tools that enable and emphasize STEM learning. Every class, we learn something new and experience a different kind of fun. After all, learning is BEST when kids are having FUN! STEM is FUN!

- *Registration is limited to 24 students. Students may be grouped based on their grade level.*
- *This is a 6-class program. Classes are conducted one hour per week for six weeks.*
